

HOW WE WORK

We prefer to work with local partner organizations.

In our projects we only use adapted technologies and methods. This ensures that the population will be able to carry out the project on their own. For this purpose we train the population. We make sure that the projects carried out by us do not have any negative influence on the water balance.

For your donation you will receive a donation receipt at the beginning of the following year.

Donations account

Beneficiary: Institute Water for Africa e. V.
Bank: Kreissparkasse Waiblingen
IBAN: DE87 6025 0010 0015 0183 62
BIC: SOLA DE S1WBN

Reason of payment:

Please give us your address so that we can send you a donation receipt.

WHO WE ARE

Institute Water for Africa e.V. is a Christian, politically independent, non-profit organization which was founded in 2005.

Our help can be asked for by people of all faiths. We work in development aid and carry out projects in the field of water management.

OUR MOTTO

Each of you should use whatever gift you have received to serve others, as faithful stewards of God's grace in its various forms. (1 Peter 4:10)

OUR MISSION

Clean water is the basis for good health and a better life. By spreading simple methods, the use of adapted technologies in water supply, water treatment and sanitation, the population should be enabled to provide sufficient clean water and good hygiene.

OUR MAIN OBJECTIVES

- Improving the living conditions of the poor through projects in the areas of water supply, sanitation and irrigation
- Training of the population and multipliers in the areas of water treatment, sanitation, hygiene and basics of water management

OUR FIELDS OF ACTIVITY

Our field of activity is water management.

- This includes
- water supply
 - sanitation
 - watering
 - hydrology
 - seminars & workshops

Our field of activity is the whole of Africa. Detailed information about our projects can be found on our website: water-for-africa.org

OUR PROJECTS

Projects in the field of water management, including e.g. water supply (water pumping, water treatment, pipeline construction), sanitation, irrigation farming, hydrology.
